Technical Writer and Project Administration Specialist with over 10 years of experience across IT, telecommunications, manufacturing, and customer service industries. Demonstrated expertise in developing technical documentation, managing data, and producing structured reports to support business and engineering functions.

In addition to documentation, has experience in analyzing operational data, identifying key insights, and contributing to the improvement of reporting processes. Currently enhancing capabilities in Data Analysis through structured learning and professional certifications, with a focus on data-driven decision making and reporting efficiency.

Known as a fast learner with strong adaptability, able to work across functions and take on new challenges while contributing effectively to organizational goals.

EDUCATION

Bachelor's Degree in English Literature (Translation)

Universitas Terbuka – South Tangerang, Indonesia

Graduated: March 2018

GPA: 2.99

EXPERIENCE

Metrocom Global Solusi | Endpoint Technical Writer | Contract

Client: Telekomunikasi Selular, Hybrid

Jakarta, Indonesia | July 2024 – December 2026

- Collected, validated, and analyzed technical and operational data across multiple endpoint security platforms, including Trend Micro, Gurdium, Splunk, Ansible, Carbon Black, Tripwire, and Microsoft Defender.
- Developed and maintained comprehensive technical documentation, including Standard Operating Procedures (SOPs), asset inventories, user manuals, Root Cause Analysis (RCA), Proof of Concept (POC), and other supporting documents.
- Monitored Trend Micro dashboards and generated data-driven operational reports across various solutions, including Deep Security, XDR, Apex One, Apex Central, and IMSVA.
- Produced periodic operational reports (daily, weekly, biweekly, monthly, and annual) to support monitoring, evaluation, and decision-making processes.
- Documented Change Requests (CRQ), user requests, and engineering activities to ensure audit readiness, compliance, and traceability.
- Prepared presentation materials and documentation to support internal knowledge sharing and effective cross-functional communication.

Mitra Integrasi Informatika | Project Admin & Technical Writer | Contract

Client: Telekomunikasi Selular, Remote

Jakarta, Indonesia | November 2021 – June 2024

- Supported the Project Manager in daily project coordination and execution, ensuring smooth operational workflows.
- Managed administrative activities, including attendance tracking, timesheets, overtime reports, and operational expense records.
- Developed and maintained project documentation such as Minutes of Meeting (MoM), KPI reports, and contractual documents to support structured project tracking and governance.
- Collected, processed, and analyzed data from AntiVirus Engineers to support Trend Micro reporting and operational evaluation.
- Extracted and processed log data from Trend Micro consoles to produce periodic and ad-hoc reports, supporting operational monitoring and data-driven decision making.
- Maintained well-structured documentation of Change Requests (CRQ), user requests, and engineering activities to ensure audit readiness and traceability.

Mitra Integrasi Informatika | SAP Master Data & Service Dispatcher | Contract

Client: Ajinomoto Indonesia, On-Site

Jakarta, Indonesia | June 2018 – October 2021

- Managed SAP master data lifecycle (create, update, block, and delete) for materials, vendors, customers, and employees, maintaining data accuracy and consistency.
- Worked closely with cross-functional teams to keep data aligned with business needs and day-to-day operations.
- **Developed and implemented LSMW templates to handle mass data uploads in SAP, reducing the need for manual entry and making the process faster and more efficient.**
- Handled customer service requests through phone, email, and ticketing systems, ensuring timely and accurate responses.
- Scheduled and assigned field technicians based on priority and expertise to keep service delivery running smoothly.
- Monitored work progress against SLA targets and followed up on any delays or issues.
- Prepared technician performance reports and provided insights to support service improvements.

Teradata Indonusa (AXIOO) | RMA Admin | Permanent

On-site

Jakarta, Indonesia | March 2015 – September 2017

- Processed Return Material Authorization (RMA) requests and reviewed supporting documents to ensure completeness and accuracy.
- Issued RMA numbers as references for return and repair processes, ensuring proper tracking.
- Worked closely with technical teams, warehouse staff, vendors, and principals to coordinate the end-to-end RMA process.
- Monitored RMA progress through completion and provided regular updates to customers regarding status and timelines.
- Prepared periodic reports on RMA activities and vendor performance to support evaluation and improvements.

Tainan Enterprises Indonesia | Purchasing | Permanent

On-Site

Jakarta, Indonesia | March 2013 – September 2013

- Prepared Purchase Requisitions (PR) and Purchase Orders (PO) based on production needs and material requirements.
- Worked closely with production, PPIC, and warehouse teams to support smooth procurement processes.
- Monitored order fulfillment and followed up on delivery issues to minimize delays.
- Maintained supplier database and purchasing records to support vendor evaluation and selection.

SKILLS

Documentation & Reporting

- Technical documentation (SOP, user manuals, RCA, POC)
- Data reporting and analysis
- Data validation and data management

Data & Tools

- Microsoft Excel (data processing, reporting)
- SQL for Data Analysis
- Google Looker Studio
- Data visualization
- Data cleaning

Systems & Platforms

- SAP Master Data Management
- Endpoint security tools (Trend Micro)
- Service Desk systems (SDP)

Technical & Design

- Basic web development (HTML, CSS, JavaScript)
- Design tools (Canva, Adobe Photoshop)

General Tools

- Microsoft Word, PowerPoint

Project

Sales / Operational Dashboard – Google Looker Studio

- Built an interactive dashboard to track operational data and key performance metrics in a more visual and easy-to-read format.
- Cleaned and prepared raw data before visualization to ensure accuracy and consistency.
- Translated data into charts, filters, and KPI summaries to make insights easier to understand and use for decision-making.
- Tools used: Google Looker Studio, Google Sheets

 Portfolio: [link here](#)

Technical Documentation Portfolio Website

- Designed and developed a personal portfolio website to showcase technical writing projects, case studies, and documentation deliverables.
- Created interactive project sections featuring implementation reports, PoC documentation, RCA reports, governance documents, SOPs, and knowledge transfer materials.
- Sanitized enterprise documents by removing confidential information, replacing sensitive data with portfolio samples, and preserving documentation structure for demonstration purposes.
- Implemented expandable case studies, downloadable PDF deliverables, and responsive layouts to improve user experience and recruiter accessibility.
- Tools used: HTML, CSS, JavaScript, GitHub Pages, Canva, Microsoft Office.
